Sisa Senja: Senja On Demand — 30s Launch Ad Storyboard

Nov 3, 2026 · @HQ MELAJU

Director's brief

Concept: "Your golden hour, on demand." Senja, the golden hour at dusk, is the moment people slow down over a cup of coffee, and it lasts about 20 minutes. Sisa Senja bottles that moment so you can open it any time. Your logo already tells the story: a half sun setting over an S-shaped river. The ad opens on that logo and closes on the real sunset.

Field	Decision
Track	Commercial product, built on the Module 1 phone template: 2 × 15 s blocks = 30 s
Product	Sisa Senja Traditional Brewed Coffee, 250 ml bottles: **KOKA** (Senja Signature with Caramel), **MOCHI** (Mocha), **CHOKI** (Chocolate)
Audience	University students and young professionals, 18 to 28, who want a café-quality kopi without the café
Platform	TikTok / Instagram Reels, 9:16 vertical, 1080 × 1920
Key message	Traditional brew, golden-hour feeling, any time you open a bottle
CTA	Senja On Demand, launching 7 November 2026. Pick your senja.
Voice	Gentle, slow, poetic female voiceover in Bahasa Melayu, delivered like a deklamasi sajak. Music: traditional Malay warisan, nostalgic (seruling, gambus, biola, rebana, gong)
Look	Photoreal premium beverage ad. Palette from your brand board: deep maroon, burnt orange, gold, cream, coffee brown, olive accent.

Structure

1. **Part 1, 0–15 s, Product hero.** This follows your phone template shot for shot (dolly, orbit, spiral, glide, zoom, pull back), with the phones swapped for bottles and the obsidian swapped for a sunset river.
2. **Part 2, 15–30 s, Soul and CTA.** It shows the traditional brew and the barista's kopi tarik. Then a cap twist at night snaps the room to golden senja, and it ends on the logo.

Director's call on the mascots: keep Koka, Mochi and Choki out of this photoreal ad. Mixing 3D chibi with live action breaks Rule 1 (consistency). They deserve their own Pixar-style 15 s spot (Module 4) as Ad #2 after launch.

Master prompt — Part 1 (0–15 s): Product hero

This is your phone prompt, line for line, rebuilt for Sisa Senja. Same voice, same four-line rhythm, same six camera moves. Upload the real KOKA, MOCHI and CHOKI bottle photos as reference images first.

```
1. Voiceover speed and tone: Gentle, slow, poetic and nostalgic female
voiceover in Bahasa Melayu (Malaysian accent), delivered like a deklamasi
sajak:

(00-03s): "Mentari berlabuh, senja bertamu."
(03-08s): "Diseduh tradisi, harum menyentuh kalbu."
(08-12s): "Setiap hirupan, sekeping senja."
(12-15s): "Senja... kini milikmu."

Visuals:

(00-2.5s): [Macro Dolly In] A soft directional golden spotlight illuminates
the amber caramel coffee inside the KOKA bottle, catching cold condensation
droplets and micro-dust particles dancing in the beam. The camera pushes
intimately toward the gold half-sun logo on the deep maroon label as the sun
emblem glows warmly, as if it were really setting.

(2.5-5.0s): [Dynamic Orbit Shot] A smooth 90-degree arc orbit around the
three bottles KOKA, MOCHI and CHOKI standing on a weathered riverside stone,
surrounded by scattered roasted coffee beans. Laser-sharp sunset light sweeps
across the wet bottle surfaces, casting deep shifting shadows while warm
light refracts through the coffee inside.

(5.0-8.0s): [High-Speed Pan and Rotate] The camera rapidly spirals as the
```

```
three bottles gently fan out in mid-air. Silky ribbons of caramel, mocha and
melted chocolate swirl through the negative space with tumbling coffee beans,
and golden light streaks reflect off the black caps as the bottles show a
subtle anti-gravity sway.

(8.0-10.5s): [Low Angle Glide] The camera glides millimeters above a calm
river surface at sunset. The three bottles stand monolithic on the edge of a
wooden jetty. A volumetric wave of golden sunlight washes over them from left
to right, sequentially igniting each gold sun logo while gentle ripples
spread across the mirrored water.

(10.5-13.0s): [Macro Fast Zoom] An aggressive zoom directly into the caramel
coffee swirling behind the condensation on the KOKA bottle. A sudden flash of
warm golden light wraps around the bottle and scatters fine coffee dust in
the foreground, while the background blurs into a tunnel of streaming sunset
light.

(13.0-15.0s): [Reverse Pull Back] A rapid retreat reveals KOKA, MOCHI and
CHOKI perfectly aligned on the riverside stone against a huge setting sun,
with palm trees and a white colonial building softly blurred behind.
Concentric ripples of glowing golden rim light pulse outward from the
bottles, sharply outlining their silhouettes before dissolving into a deep,
warm cinematic fade-out.

Style: photorealistic premium beverage commercial, anamorphic 35mm look, warm
golden-hour grade, deep maroon, burnt orange, gold and coffee-brown palette,
soft film grain, 9:16 vertical. Keep bottle shape, labels and logo identical
to the reference images. No added text, no watermarks.
```

What I changed from the phone version, and why

- **The 360° orbit is now a 90° arc.** A full orbit makes the model invent the back of the label, and that's where text gets garbled.
- **The obsidian floor is now river water at sunset.** That's your brand world, and it echoes the river in your logo.
- **Neon streaks are now caramel, mocha and chocolate ribbons.** Each flavour gets a visual signature.
- **The Malay VO keeps your template's four-beat rhythm** and adds an end rhyme (bertamu / kalbu / milikmu), so it lands like a sajak.

Master prompt — Part 2 (15–30 s): Soul, switch, CTA

This uses the same format and voice. It brings in the human side (your barista) and the "on demand" payoff, using the Module 3 single-frame switch. Upload the barista photo as the character reference.

```
1. Voiceover speed and tone: Gentle, slow, poetic and nostalgic female
voiceover in Bahasa Melayu (Malaysian accent), delivered like a deklamasi
sajak:

(15-19s): "Diseduh cara lama, ditarik penuh rindu."
(19-23s): "Kini senjamu... tak perlu menunggu."
(23-26s): "Koka. Mochi. Choki. Pilih senjamu."
(26-30s): "Sisa Senja... jiwa lama, hirupan baharu."

Visuals:

(15.0-17.5s): [Macro Dolly In] Inside a warm wooden kopi stall at golden
hour, dark traditional coffee streams through a cloth sock filter into an
enamel pot. Thick steam curls upward and catches a strong amber backlight,
while the barista's hands in a dark brown apron hold the filter steady.

(17.5-20.0s): [Low Angle Tracking] [BARISTA] performs a long, arcing kopi
tarik pour between two steel mugs in slow motion. The stream of coffee glows
like molten gold against the setting sun behind him, with a strong rim light
on his wavy hair and round glasses.

(20.0-22.5s): [Static Medium Shot + SINGLE-FRAME SWITCH] At night under cool
blue moonlight, a student at a study desk twists the cap off a cold KOKA
bottle. On the exact frame of the cap click, the whole room and window
instantly become full golden sunset light. There is ZERO transition: no fade,
morph, dissolve or flash. The face and hands are relit warm on the same
frame.

(22.5-25.0s): [High-Speed Pan] Three rapid whip-pan beats, one per bottle.
KOKA lands with falling caramel cubes, MOCHI with a creamy mocha splash, and
CHOKI with tumbling chocolate chunks. Each lands in golden light against a
deep maroon backdrop.

(25.0-27.5s): [Low Angle Glide] [BARISTA] stands on a wooden riverside jetty
at sunset and raises a KOKA bottle toward the sun. The sun sits behind the
bottle and makes the coffee glow, with lens flare and warm rim light.
```

```
(27.5-30.0s): [Reverse Pull Back] A rapid retreat and crane up reveal the
huge sun sinking into a winding S-shaped river, mirroring the Sisa Senja
logo. The three bottles stand on the jetty in silhouette as concentric
ripples of golden light pulse outward before a deep, warm cinematic fade-out.

Sound: soft riser before the cap click, a crisp cap-crack and low-frequency
impact on the switch frame, a brief warm reverberant tail.
Style: photorealistic premium beverage commercial, anamorphic 35mm look, warm
golden-hour grade, deep maroon, burnt orange, gold and coffee-brown palette,
soft film grain, 9:16 vertical. Keep [BARISTA] identity and bottle labels
identical to the reference images. No added text, no watermarks.
```

Why this ending works: the final frame (the sun over an S-river) is your logo in real life. In CapCut, cross-dissolve it straight into the logo end card so the ad opens and closes on the same shape.

Asset lock (before any video)

Rule 1: consistency is the biggest cost. Lock these first and copy each descriptor word for word.

Asset	Locked descriptor	How to lock it
KOKA	250 ml clear bottle with black screw cap, amber caramel coffee, deep maroon label with gold half-sun logo	Real bottle photos: front, 45° and side. Generate 3 hero shots: studio spotlight, golden hour, dark backdrop with rim light
MOCHI	Same bottle, creamy beige mocha, maroon and olive-green label	Same as KOKA
CHOKI	Same bottle, reddish-brown chocolate drink, maroon-brown label	Same as KOKA
LOGO	Gold half sun setting over an S-shaped river, on deep maroon	Use your logo file as-is in CapCut. Never ask the AI to draw it
BARISTA	A young Malaysian man about 20, thick wavy black hair, thin round clear-frame glasses, slim build, teal-blue three-quarter-sleeve top, dark brown barista apron, silver wristwatch	Character sheet (Module 2A) from your photo: 3 views, 6 expressions, 4 actions, 3:4

Asset	Locked descriptor	How to lock it
WORLD	Riverside waterfront at sunset with palm trees, a white colonial-era building, a wooden jetty and calm river reflecting the sun; plus a warm wooden kopi stall	2 base images: jetty at golden hour, stall interior. Add a night study-desk room for the switch shot
STYLE	photorealistic premium beverage commercial, anamorphic 35mm look, warm golden-hour grade, deep maroon, burnt orange, gold and coffee-brown palette, soft film grain, 9:16 vertical	End every prompt with it

Two checks before you generate

- **Real bottles?** The bottles in your images are AI renders. If physical bottles exist, shoot them on a phone against a plain background. Real photos lock the label far better than renders.
- **Consent:** confirm the barista in the photo has agreed to be transformed and featured (Module 3 rule). Label the final ad as AI-assisted.

Storyboard — 12 shots, 30 s, 9:16

Each shot's full AI prompt is the matching timed line in the master prompts above. The Model column spends credits per Rule 2: cheap models for build-up shots, the flagship model for the money shots.

#	Time	Shot size	Camera	Visual	Audio / VO	Model
01	0.0–2.5 s	Extreme Close-Up	Macro Dolly In	KOKA amber coffee and condensation, push into the glowing gold sun logo	Solo seruling (bamboo flute). VO: "Mentari berlabuh, senja bertamu."	Flagship
02	2.5–5.0 s	Medium Shot	90° Arc Orbit	Three bottles on riverside stone with beans, sunset light sweep	Whoosh. Gambus enters. VO: "Diseduh tradisi, harum menyentuh kalbu."	Flagship

#	Time	Shot size	Camera	Visual	Audio / VO	Model
03	5.0–8.0 s	Medium Long Shot	High-Speed Pan and Rotate	Bottles fan out mid-air with caramel, mocha and chocolate ribbons	Rebana inang rhythm lands at 5.0 s	Flagship
04	8.0–10.5 s	Low Long Shot	Low Angle Glide	Over the river, sunlight wave ignites each logo on the jetty	VO: "Setiap hirupan, sekeping senja."	Cheap
05	10.5–13.0 s	Extreme Close-Up	Macro Fast Zoom	Into the caramel swirl, golden flash, coffee dust	Impact + shimmer	Cheap
06	13.0–15.0 s	Long Shot	Reverse Pull Back	Three bottles against a giant sun, rim-light ripples	VO: "Senja… kini milikmu." Music drops to biola alone	Cheap
07	15.0–17.5 s	Close-Up	Macro Dolly In	Cloth-sock filter pour, steam in amber backlight, barista's hands	Pour sound, kettle hiss. VO: "Diseduh cara lama, ditarik penuh rindu."	Cheap
08	17.5–20.0 s	Medium Shot	Low Angle Tracking	Barista's kopi tarik arc glowing like molten gold, slow motion	Liquid stream SFX	Flagship
09	20.0–22.5 s	Medium Shot	Static + **single-frame switch**	Night study desk, cap twist, room snaps to golden senja	Riser, cap crack, LF impact. VO: "Kini senjamu… tak perlu menunggu."	Flagship
10	22.5–25.0 s	Close-Up × 3	High-Speed whip pans	KOKA + caramel, MOCHI + mocha splash, CHOKI + chocolate	Three kompang hits. VO: "Koka. Mochi. Choki. Pilih senjamu."	Cheap
11	25.0–27.5 s	Medium Long Shot	Low Angle Glide	Barista on the jetty raising KOKA to the sun, flare	Music builds	Cheap
12	27.5–30.0 s	Extreme Long Shot	Reverse Pull Back + crane	Sun sinking into an S-river (live-action logo), dissolve to logo end card	Gong at 29.5 s. VO: "Sisa Senja… jiwa lama, hirupan baharu." (Date on screen only.)	Flagship

Edit-only overlays (never generated): the logo end card, "SENJA ON DEMAND · 07.11.2026", "Pick your senja", the flavour names in shot 10, captions, and a small "AI-assisted" label.

Production run sheet — step by step

Work top to bottom and tick as you go. Three background plates are already locked (jetty, kopi stall, night desk). Credits go furthest if you **test one shot before batching** and keep at most 2 takes per shot.

Which platform for what

Job	Platform	Why
Reference images and compositing	ChatGPT image or Gemini	Best at keeping a reference product and label intact
Flagship video (shots 01, 02, 03, 08, 09, 12)	Veo (Gemini / Flow) or Kling top tier	Hero and money shots, worth the credits
Cheap video (shots 04, 05, 06, 07, 10, 11)	Hailuo or Kling standard	Build-up shots, Rule 2
Voiceover	ElevenLabs (free tier)	Most natural English female voice
Edit, music, SFX, captions	CapCut	Everything else, free

Phase 1 — Finish the asset lock (images)

- [ ] Make a folder: `01_brief`, `02_base_images`, `03_video_clips`, `04_audio`, `05_exports`. Name files by shot: `shot01.png`, `shot01.mp4`.
- [ ] **Redo the barista sheet as photoreal.** The current one is 3D Pixar style, and this ad is photoreal, so it would break Rule 1. Attach his **real photo** plus the Pixar sheet (for poses and outfit) and run prompt 1A below. Keep the Pixar sheet for the mascot ad later.
- [ ] Run prompt 0A (bottle range hero) with your product image attached. Keep the version where all three labels read correctly.
- [ ] Fix the night desk plate: run prompt 1B to swap the empty water bottle for KOKA.

1A · Photoreal barista sheet (attach: real photo + Pixar sheet)

```
Using image 1 (real photo) for the man's exact face, glasses, hair and skin tone, and image 2 only as a guide for outfit and poses, create a PHOTOREALISTIC character sheet of the same real man: thick wavy black hair, thin round clear-frame glasses, slim build, teal-blue three-quarter-sleeve top, dark brown barista apron, black trousers, brown sneakers, silver wristwatch. Row 1: front, 3/4, side and back full-body standing on a pure white background. Row 2: five chest-up expressions (wink smile, calm smile, laughing, surprised, tired). Row 3: four actions (pouring milk, kopi tarik pull with two steel mugs, walking, holding up a small coffee bottle). Real human proportions, visible natural skin texture and pores, no cartoon, no 3D render, no beauty filter. Neutral studio lighting, images only, no text. Aspect ratio 3:4.
```

1B · Night desk fix (attach: night desk plate + bottle reference)

```
Edit image 1: replace the empty clear water bottle on the desk with the KOKA bottle from image 2, same position and scale, keeping its label, maroon colours and gold sun logo exactly as in image 2. Light it with the same cool blue moonlight as the room. Change nothing else.
```

Phase 2 — Build the first frames (images, shots 01–12)

- [ ] For product-on-plate shots (02, 04, 06), composite instead of generating from scratch. Attach the jetty plate + bottle hero and run the compositing prompt below.
- [ ] For the other shots, use the IMAGE prompts in the Scene prompts sections, with their listed attachments.
- [ ] QC every frame before it goes to video: labels and logo correct, barista matches 1A, five fingers, no stray text, 9:16.

Compositing prompt (attach: jetty plate as image 1, bottle hero as image 2)

```
Place the three bottles KOKA, MOCHI and CHOKI from image 2 standing side by side on the flat stone in image 1, natural scale for 250 ml bottles. Keep image 1's scene, sunset, light direction and beans unchanged. Relight the bottles with the warm sunset backlight from the left, add soft contact shadows on the stone and cold condensation droplets on the glass. Keep every label, logo and cap exactly as in image 2. 9:16.
```

Phase 3 — Test one clip before spending

- [ ] Run **shot 02** on the cheap tier first. Check that the labels survive the 90° arc.

- [ ] If the labels warp, shrink the move to "slow 30-degree arc" or "slow push-in" and lock that rule for every product shot.

Phase 4 — Generate all video clips

- [ ] Upload each approved first frame, paste its VIDEO prompt, set 9:16, 5 s (you'll trim in the edit).
- [ ] Shot 09: generate Video A and Video B separately with identical framing. The switch happens in CapCut.
- [ ] Shot 10: three 1-second clips.
- [ ] Regenerate only failures, at most 2 takes per shot. Save the winners as `shot01.mp4` through `shot12.mp4`.

Phase 5 — Voiceover (Malay) and music

- [ ] Record the 8 Malay lines (Voiceover table in the Audio section). Use a real soft, warm voice if you can, or ElevenLabs Multilingual (Malay) at about 0.9 speed. Do one line per file and leave pauses between lines.
- [ ] Generate the warisan track with the Suno or Udio prompt (instrumental, about 84 BPM). Make 2–3 versions and pick the one whose seruling intro feels most nostalgic.
- [ ] Save `vo_01.mp3` through `vo_08.mp3` and `music_warisan.mp3` in `04_audio`.

Phase 6 — Edit (CapCut)

- [ ] New 9:16 project. Lay the 8 VO lines first at the timings in the Voiceover table.
- [ ] Drop clips in order and trim to the VO. Hard-cut shot 09 A→B on the cap-crack SFX.
- [ ] Lay the warisan track and match the music cue table. Rebana enters at 5.0 s, it drops to biola at 13 s, the ensemble swells at 22.5 s, and the gong lands at 29.5 s. Keep music about 12 dB under the voice.
- [ ] SFX: river ambience under 01–06, pour on 07, liquid stream on 08, cap crack + low impact on 09, three kompang hits on 10.
- [ ] Overlays: real logo file at the end, "SENJA ON DEMAND · 07.11.2026", flavour names on shot 10, Malay captions in an elegant serif (optional small English line underneath for reach), and a small "AI-assisted" label.

Phase 7 — Export and launch

- [ ] Run the pre-export QC (Audio, edit section), then export 1080 × 1920.
- [ ] Fri 6 Nov: post a 6 s teaser (shots 01–02 + date).

- [ ] Sat 7 Nov: post the full 30 s around sunset. Save the prompts and tools you used (Rule 3).

Scene prompt pack — Step 0: lock the assets

Run these once, pick the best result of each, and save them as `asset_koka.png`, `asset_range.png`, `asset_barista_sheet.png` and so on. Every scene below attaches them as references. Image tools: Gemini, Leonardo.ai, Bing or Higgsfield. Video tools: Gemini/Veo, Kling or Hailuo.

0A · Bottle range hero (attach: your product render or real bottle photos)

```
Use the attached image as the exact reference for the three bottles KOKA, MOCHI and CHOKI: keep bottle shape, black screw caps, label layout, maroon colours, gold half-sun logo and all label text exactly as shown. Do not redraw or rewrite any text. Place the three bottles side by side on a weathered flat riverside stone, scattered roasted coffee beans around the base, cold condensation droplets on the glass. Three lighting versions: (1) soft directional studio spotlight on a dark maroon backdrop, (2) golden-hour sunset backlight over a river, (3) dark obsidian surface with a strong golden rim light. Photorealistic premium beverage commercial, anamorphic 35mm look, soft film grain, 9:16 vertical. No extra text, no watermarks.
```

0B · Barista character sheet (attach: the barista photo)

```
Generate a character design sheet faithfully replicating the man in the attached photo: same face, thick wavy black hair, thin round clear-frame glasses, skin tone, slim build, teal-blue three-quarter-sleeve top, dark brown barista apron, silver wristwatch. Row 1: front, side and back full-body standing poses on a pure white background with subtle shading. Row 2: six close-up expressions (joy, calm focus, surprise, warm smile, thoughtful, neutral). Row 3: four actions (pouring coffee, kopi tarik pull with two steel mugs, walking, holding up a bottle). Visible natural skin texture and pores, no beauty filter, no airbrushing. Neutral global illumination, clean multi-panel layout, images only, no text. Aspect ratio 3:4.
```

0C · World plates (no reference needed; 9:16, empty of people)

- **Jetty:** `A weathered wooden jetty over a calm wide river at golden hour, a huge orange sun sinking on the horizon with a long golden reflection, palm trees silhouetted on the bank, a white colonial-era building with arched`

`windows softly blurred on the right, a flat stone slab at the end of the jetty as an empty pedestal, warm haze, volumetric beams` + [STYLE]

- **Kopi stall:** `Interior of a traditional Malaysian wooden kopi stall at golden hour, a dark cloth sock filter over a white enamel kopi pot, two stainless steel pulling mugs on a worn counter, thick steam glowing in amber backlight, coffee beans on the counter` + [STYLE]
- **Night desk:** `A student's study desk by a window at night, cool blue moonlight and city lights outside, laptop and notebooks, lamp off, an empty spot in the foreground for a bottle` + `photorealistic cinematic still, cool blue night grade, soft film grain, 9:16`

[STYLE] = `photorealistic premium beverage commercial, anamorphic 35mm look, warm golden-hour grade, deep maroon, burnt orange, gold and coffee-brown palette, soft film grain, shallow depth of field, 9:16 vertical, no text, no watermarks`

Scene prompts — Part 1 (shots 01–06)

The workflow for every shot is the same. **Image** = the first frame (attach the listed assets). **Video** = upload that frame and paste the motion prompt (image-to-video, 3–5 s). Generate 2–3 takes and keep the best. Regenerate only the failures.

Shot 01 · 0.0–2.5 s · ECU · Macro Dolly In · attach 0A

```
IMAGE: Extreme close-up of the KOKA bottle from the reference, amber caramel coffee glowing inside, cold condensation droplets on the glass, the gold half-sun logo on the deep maroon label sharp in the centre of frame, micro-dust particles floating in a soft directional golden spotlight, dark maroon background. Keep label and logo exactly as reference. [STYLE]

VIDEO: [Macro Dolly In] Slow intimate push-in toward the gold sun logo. Dust particles drift through the light beam, a single condensation drop slides down the glass, and the logo's sun glows warmer as if it were really setting. Label stays perfectly sharp and unchanged. 3 seconds.
```

Shot 02 · 2.5–5.0 s · MS · 90° Arc Orbit · attach 0A + jetty plate

```
IMAGE: Medium shot of KOKA, MOCHI and CHOKI from the reference standing side by side on a weathered riverside stone at sunset, roasted coffee beans scattered around, a river and palm trees softly blurred behind, warm backlight with condensation sparkling on the bottles. [STYLE]

VIDEO: [Dynamic Orbit Shot] Smooth 90-degree arc orbit from front-left to front-right around the three bottles, never showing the backs. A laser-sharp sweep of sunset light glides across the wet bottles, shadows shift on the stone, and warm light refracts through the coffee. Labels unchanged. 3 seconds.
```

Shot 03 · 5.0–8.0 s · MLS · High-Speed Pan and Rotate · attach 0A

```
IMAGE: The three bottles KOKA, MOCHI and CHOKI floating in mid-air fanned out diagonally against a deep maroon-to-orange gradient void, silky ribbons of caramel, mocha and melted chocolate swirling between them, roasted coffee beans tumbling, golden light streaks. [STYLE]

VIDEO: [High-Speed Pan and Rotate] The camera spirals quickly around the floating bottles as they fan out with a subtle anti-gravity sway. Caramel, mocha and chocolate ribbons twist through the space, coffee beans tumble in slow motion, and golden streaks flash across the black caps. 3 seconds.
```

Shot 04 · 8.0–10.5 s · Low LS · Low Angle Glide · attach 0A + jetty plate

```
IMAGE: Very low angle just above calm river water at sunset, the three bottles standing in a row on the edge of a wooden jetty, the huge sun low behind them, golden reflections on the water surface in the foreground. [STYLE]

VIDEO: [Low Angle Glide] The camera glides forward millimetres above the river surface toward the bottles. A volumetric wave of golden sunlight sweeps from left to right, lighting up each gold sun logo in turn, while gentle ripples spread across the mirrored water. 3 seconds.
```

Shot 05 · 10.5–13.0 s · ECU · Macro Fast Zoom · attach 0A

```
IMAGE: Macro extreme close-up through the condensation on the KOKA bottle, swirling amber caramel coffee visible inside the glass, warm golden backlight, fine coffee dust floating in the foreground. [STYLE]

VIDEO: [Macro Fast Zoom] An aggressive fast zoom into the swirling caramel coffee. A sudden flash of warm golden light wraps around the bottle and scatters coffee dust toward the lens, while the background stretches into a tunnel of streaming sunset light. 2.5 seconds.
```

Shot 06 · 13.0–15.0 s · LS · Reverse Pull Back · attach 0A + jetty plate

```
IMAGE: Long shot of KOKA, MOCHI and CHOKI perfectly aligned on a stone at the end of a wooden jetty, silhouetted against a giant setting sun over a wide river, palm trees and a white colonial building softly blurred at the side, golden rim light outlining each bottle. [STYLE]

VIDEO: [Reverse Pull Back] A rapid smooth retreat away from the bottles reveals the full sunset and river. Concentric ripples of glowing golden rim light pulse outward from the bottles, then the frame dissolves into a deep warm fade. 2.5 seconds.
```

Scene prompts — Part 2 (shots 07–12)

Shot 07 · 15.0–17.5 s · CU · Macro Dolly In · attach 0B + kopi stall plate

```
IMAGE: Close-up inside a warm wooden kopi stall at golden hour, the barista's hands from the reference (dark brown apron, silver wristwatch) holding a dark cloth sock filter over a white enamel kopi pot, a dark stream of traditional coffee pouring through, thick steam glowing in strong amber backlight. [STYLE]

VIDEO: [Macro Dolly In] A slow push-in on the coffee streaming through the cloth sock filter. Steam curls upward and catches the amber backlight, the hands hold steady, and drops of coffee glint like gold. 2.5 seconds.
```

Shot 08 · 17.5–20.0 s · MS · Low Angle Tracking · attach 0B + jetty or stall plate

```
IMAGE: Low-angle medium shot of the barista from the reference sheet (wavy
black hair, round clear glasses, teal-blue top, dark brown apron) mid kopi
tarik pull, one steel mug raised high and one low, a long arc of coffee
between them, the setting sun directly behind him creating a strong golden
rim light on his hair and glasses. [STYLE]

VIDEO: [Low Angle Tracking] In slow motion the barista pulls the kopi tarik
in a long smooth arc between the two mugs. The stream glows like molten gold
against the sun while the camera tracks slowly sideways at a low angle. His
face and glasses stay consistent with the reference. 2.5 seconds.
```

Shot 09 · 20.0–22.5 s · MCU · Static + switch · attach 0A + night desk plate. Director's tip: build the switch in the edit. Generate two clips with identical framing and hard-cut between them on the cap-crack SFX. It's more reliable than asking one model to do it. Showing hands only avoids locking a second face.

```
IMAGE A (night): Medium close-up of a student's hands at a desk at night,
cool blue moonlight from the window, holding the cold KOKA bottle from the
reference and gripping the black cap, laptop softly lit behind.
Photorealistic cinematic still, cool blue night grade, soft film grain, 9:16.

IMAGE B (golden): Exactly the same framing, hands and bottle, but the room
and window now filled with warm golden sunset light, rim light on the bottle
and hands, sunset sky through the window. [STYLE]

VIDEO A: [Static] The hands twist the cap of the KOKA bottle in cool
moonlight, building to the moment the cap cracks open. 1.5 seconds.
VIDEO B: [Static] The cap lifts off in warm golden sunset light, light
shimmering on the bottle as the hands relax. 1 second.
EDIT: Hard cut from A to B exactly on the cap-crack sound, with a low-
frequency impact. No dissolve.
```

Shot 10 · 22.5–25.0 s · CU × 3 · High-Speed whip pans · attach 0A. Generate three separate 1-second clips.

```
10a IMAGE: The KOKA bottle from the reference against a deep maroon backdrop, golden caramel cubes falling around it, warm spotlight. [STYLE]
10b IMAGE: The MOCHI bottle from the reference against a deep maroon backdrop, a creamy mocha splash curling around it, warm spotlight. [STYLE]
10c IMAGE: The CHOKI bottle from the reference against a deep maroon backdrop, dark chocolate chunks tumbling around it, warm spotlight. [STYLE]

VIDEO (each): [High-Speed Pan] The camera whips in from the side and lands on the bottle as the ingredients fall in slow motion around it. Label unchanged. 1 second.
```

Shot 11 · 25.0–27.5 s · MLS · Low Angle Glide · attach 0B + 0A + jetty plate

```
IMAGE: Low-angle medium long shot of the barista from the reference standing on a wooden riverside jetty at sunset, raising the KOKA bottle toward the sun so the sun sits directly behind it and makes the coffee glow, lens flare, warm rim light on his hair and glasses. [STYLE]

VIDEO: [Low Angle Glide] The camera glides slowly toward him as he lifts the bottle into the sun. The coffee glows amber, a gentle lens flare blooms, and he smiles calmly toward the river. 2.5 seconds.
```

Shot 12 · 27.5–30.0 s · ELS · Reverse Pull Back + crane · attach jetty plate

```
IMAGE: Aerial extreme long shot of a huge half-sun sinking into the horizon above a wide river that winds through the landscape in a clear S-shaped curve, golden light on the water, the wooden jetty small in the foreground with three bottles in silhouette, warm haze. [STYLE]

VIDEO: [Reverse Pull Back] The camera pulls back and cranes up to reveal the S-shaped river beneath the setting sun. Concentric ripples of golden light pulse across the water before a deep warm fade. 2.5 seconds.
EDIT: Cross-dissolve the last second into your real logo file (half sun over S-river), then add SENJA ON DEMAND · 07.11.2026.
```

Before each generation, check: labels and logo match the reference, the barista's face and glasses match 0B, hands have five fingers, there's no stray AI text, and the 9:16 framing leaves room at the bottom for captions.

Audio, edit and the road to 7 November

Voiceover: 8 Malay lines, 38 words, read slowly like a sajak. Best option: record a real person with a soft, warm voice on a phone in a quiet room. Malay poetry sounds far more alive from a human than from TTS. Fallback: ElevenLabs Multilingual (Malay), speed about 0.9, one line at a time. Use "…" in the text to force pauses, and check that *seduh*, *hirupan* and *kalbu* are pronounced correctly.

Time	Line	Meaning
00–03 s	Mentari berlabuh, senja bertamu.	The sun drops anchor; dusk comes calling.
03–08 s	Diseduh tradisi, harum menyentuh kalbu.	Brewed by tradition, its aroma touches the heart.
08–12 s	Setiap hirupan, sekeping senja.	Every sip, a piece of dusk.
12–15 s	Senja… kini milikmu.	Dusk… now yours.
15–19 s	Diseduh cara lama, ditarik penuh rindu.	Brewed the old way, pulled (*tarik*) with longing.
19–23 s	Kini senjamu… tak perlu menunggu.	Now your dusk… needn't wait.
23–26 s	Koka. Mochi. Choki. Pilih senjamu.	Pick your senja.
26–30 s	Sisa Senja… jiwa lama, hirupan baharu.	Old soul, new sip.

Music: traditional Malay warisan, nostalgic, slow asli/inang feel (about 84 BPM). It follows the picture beat for beat.

Time	Music cue
0–5 s	Solo seruling (bamboo flute) over soft river ambience
5–13 s	Rebana inang rhythm comes in, gambus carries the melody, biola sustains underneath
13–15 s	Everything drops away except the biola: a breath before Part 2

Time	Music cue
15–20 s	Gambus plus soft accordion (joget-asli nostalgia) under the pour and kopi tarik
20–22.5 s	Near silence, then the cap crack and the full ensemble swells on the switch
22.5–26 s	Three kompang hits, one per flavour
26–30 s	Biola and seruling outro, deep **gong** at 29.5 s

AI music prompt (Suno or Udio, instrumental):

```
Instrumental traditional Malay asli and inang music, nostalgic warisan heritage mood, slow 84 BPM, solo seruling bamboo flute intro over river ambience, gambus oud melody, biola violin sustained harmony, rebana and kompang hand drums, soft vintage accordion, warm analog old-radio texture, cinematic golden sunset feeling, builds gently then ends on a deep gong, no vocals, 30 seconds
```

Don't use a famous lagu asli recording. Copyright claims will mute the post on TikTok. Generate your own track, or search CapCut's library for "Malay traditional". Optional signature: a short sape intro instead of the seruling gives the ad a Borneo identity. Keep the music under the VO and the SFX under both.

CapCut edit, in order

1. New 9:16 project. Lay the VO first; it's your timeline.
2. Drop clips 01–12 in order and cut on the beat.
3. Add SFX: cap crack, pour, whooshes, impacts.
4. Run auto-captions and fix the spelling: Koka, Mochi, Choki, Sisa Senja.
5. Logo end card at 28.5 s plus the date, and the AI-assisted label.
6. Export at 1080 × 1920. Keep text out of the bottom 20% and the right edge, where TikTok's buttons sit.

Pre-export QC: the first 3 s hook, bottles and labels match in every shot, barista's face is consistent, VO ends before the final frame, captions are correct, CTA and date are on screen, AI label is present.

4-day plan

Day	Date	Work
Tue	3 Nov	Storyboard locked (this doc). Shoot real bottle photos.
Wed	4 Nov	Asset lock: bottle hero shots, barista sheet, 3 world base images. QC.
Thu	5 Nov	Generate Part 1 and Part 2 clips. Regenerate only failures. Record VO.
Fri	6 Nov	Edit, captions, export. Post a 6 s teaser (shots 01–02 + date).
Sat	7 Nov	Launch: post the full 30 s at senja (~6:30 pm), timed to the real sunset.

First test after launch: if retention drops in the first 3 s, swap shot 01 for shot 12 (the sun over the river) as the opener.
